(No program on July 3rd)

12 sessions (days) - ~\$7/hour

**Program is designed for students entering
Grade 6 in the Fall 2020**

DEADLINE TO REGISTER: JUNE 1, 2020

TREK 2020 Sessions

Math: Students will work with the online summer math assignment as one of the activities accomplished during this segment. Students will utilize the computer labs to build math skills through the use of math games and puzzles. Students will work in pairs and in small groups to enhance their understanding of the various middle school math concepts.

Reading: Students will work independently and in groups to complete a novel listed on their summer reading list. Along with the completion of the novel, the students will be involved in various activities (vocabulary building, literary elements, predictions, etc.) to enhance and stimulate their interest in reading.

STEM: Students will become directly involved in a variety of concepts driven to enhance their science, technology, engineering and math knowledge and prepare them for their upcoming year at DMS. Students will have available an assortment of STEM supplies and equipment in order to engage them in STEM activities and persuade them to "think outside of the box!"

TREK-reaction: During this session, students will participate in groups engaging in physical activities, including soccer, dodgeball, and basketball. Students will work on social and emotional development through team building activities.

Google/Tech: Students experience the Google Suite (Google Docs, Sheets, etc) and a variety of educational and technology tools through this course. Due to the fact that DMS is a 1:1 school with every student getting a Chromebook, students' advance experience and knowledge of their use is beneficial when entering 6th grade.

Courses based on 2018 program - subject to change

Program Information:

Location: TREK will be located at Dedham Middle School.

Students: This summer program is designed for student entering Grade 6 in the fall.

Materials: Students will be provided with all necessary materials.

General information: A nutritious snack and beverage will be provided daily.

Why TREK?

Dedham Public Schools continues to strive to meet the community needs by offering a summer program for students who will be entering DMS in the fall. This 12 day program will consist of math-strengthening activities, reading strategies, and technology (all beneficial for improving test scores), science activities, verbal expression and social and emotional development. Students will work with a large group, small group, and individualized activities.

In addition to the academic curriculum, students will participate in a segment driven toward summer fun! Group activities, including soccer, dodgeball and basketball, along with favorite physical education games will permit everyone to sharpen their skills while having fun with their peers! This unit will reinforce the importance of daily physical activity as well as the importance for teamwork.

TREK STAFF

The TREK teachers are experienced Math, Science, Reading, World History, Technology, World Language, and English Teachers from all grade levels and an assortment of the DPS teams. By working with a variety of teachers in the Dedham Public Schools, TREK students will be given an opportunity to become familiar with different teachers, subjects, and the school building before the first day of school. In addition, the TREK teachers work directly with students to accomplish their summer reading and math.

Dedham Middle School, 70 Whiting Ave, Dedham, MA 02026
