GENERAL PUBLIC COMMENT

Riverdale parents are present to address SC members. We are very concerned about pending class sizes for 3rd and 5th grades. Debate regarding class size and has gone on for years. Please

think long term. This will be a three-year commitment to these students. Please consider best classrooms for these large class sizes. Parent expectations for learning for these children will remain high. Superintendent Doe stated she has met or spoken with many Riverdale parents and wants to convey that classroom size is a priority. The budget is still in flux. The first priority is to restore staff. We have increased class size in each elementary school.

Reports:

Mr. Morton Orlov – from Mass Insight Education and Research Institute presented highlights on the Massachusetts Math and Science Initiative Grant recently awarded to Dedham Public Schools. Ms. Joanne McCormick, Director of Guidance will be the facilitator for the program. Milton and Randolph will be a part of the cohort. Out of sixty schools that were solicited, fifty-eight responded and fourteen were chosen. This program is not an experiment; they have over twelve years of data. The goals of the program are to increase participation by taking students to the right and to the left, to increase performance and develop a collaborative working relationship with a challenge. Mr. Olov expects to make a formal public announcement with a kickoff event at the high school in the fall.
