The Math Team is made up of students who enjoy math and problem solving. We participate in the Southeastern Massachusetts Mathematics League, a six-division league, with over 30 other participating schools. We meet every Thursday after school to do old problems from past competitions to prepare for monthly meets. Students of all math levels are welcome to join!

In addition, high-level math students are invited to participate in the New England Math League. This league meets once a month before school, and students are given 6 challenging math problems to solve in 30 minutes.
