

Link Crew

Link Crew is a program designed to help ease the transition to the high school for ninth grade students. Junior and senior students are selected to serve as role models and leaders for younger students. These Link Crew leaders get trained during the summer, and then they put on a dynamic freshman orientation prior to the start of the school year. This starts a connection for the new ninth grade students even before they enter the building as full-time students. Link Crew leaders continue to work with their Crew throughout the school year in various ways, including informal check-ins, structured lessons and social gatherings. Along with helping the transition to high school, Link Crew is intended to foster relationships between students of all ages and groups in order to build a more cohesive school community.
